

## REMARKS

By this Preliminary Amendment, Applicant has revised allowed claims 16 and 20 to state more clearly that (a) in one of the two diffraction gratings, the sign of the optical power based on diffraction differs from the sign of the optical power based on refraction of the curved surface where the one diffraction grating is found, and (b) with respect to the other diffraction grating, the signs are the same for the optical power based on diffraction and for the optical power based on refraction of the curved surface where the other diffraction grating is found.

Also, new Claim 25 has been added.

Applicant's undersigned attorney may be reached in our New York Office by telephone at (212) 218-2100. All correspondence should continue to be directed to our address listed below.

Respectfully submitted,

Attorney for Applicant
